President's Message

A Committed Group, Focused on the Future

Since 1920, the MANTION Group has established itself as a key player in the design and manufacturing of high-quality sliding systems. With over a century of history, we have continuously evolved, innovated, and adapted—while remaining true to our founding values.

Our industrial foundation is one of our greatest strengths: thanks to our integrated production workshops, we control the entire manufacturing chain, from design to delivery. This autonomy allows us to ensure consistent quality, high responsiveness, and continuous innovation.

We regularly expand our product range with new solutions designed to meet our customers' evolving needs and the challenges of tomorrow. This spirit of innovation is driven by our presence in over 80 countries, reflecting our international ambition.

But above all, our success is built on the women and men who make up our Group. Their daily commitment, expertise, and professionalism are the driving force behind our growth.

Environmental responsibility guides every one of our decisions. We are committed to reducing our ecological footprint, prioritizing sustainable materials, and designing solutions that respect the planet throughout the entire product lifecycle.

Finally, customer satisfaction remains at the heart of our mission. Listening to our clients, anticipating their needs, and offering solutions that combine performance, design, and durability is our top priority.

Together, we are building the solutions of tomorrow.

Florian CUNIN
Chairman & CEO, MANTION Group

MANTION's Values

Customer satisfaction, the well-being of our employees, and care for the planet are the three core values that guide our daily decisions and actions.

Our purpose:

"To be an agile manufacturer that adapts to the needs of its customers in the sliding systems and overhead handling markets, while developing expertise, operational excellence, and innovation through employee engagement — all with respect for the environment."

Customer satisfaction remains at the heart of our mission. We constantly strive to exceed expectations, understand specific needs, and offer solutions that perfectly combine functionality and aesthetics.

At the core of our success lie our fundamental values, embodied by the exceptional women and men who form the very fabric of our company. Their expertise, dedication, and passion are the true drivers of our success. We are committed to fostering an environment where everyone can thrive and contribute to our shared goal: excellence.

Our commitment to **the environment** guides every decision we make. We are determined to minimize our ecological footprint, promote sustainable practices, and continuously innovate to develop solutions that are more respectful of our planet.

The MANTION Group, a "Made in France" SME with an International Reach

Our People

A Culture of High Standards

As a market leader, MANTION relies on energy and technological innovation to drive its success.

This growth is made possible by the dynamism and professionalism of our teams, who are constantly seeking new solutions, and by our mastery of the entire industrial process—both in-house and across our production subsidiaries.

A Wide Range of In-House Expertise:

Stamping, Welding and mechanical assembly,
Riveting, Bending, Assembly, Sheet metal work, Cold roll forming,
Curving, Laser cutting...

Our Workshops

COLD ROLL FORMING

Our cold roll forming workshop precisely shapes steel and other metals into custom profiles, meeting the highest technical standards.

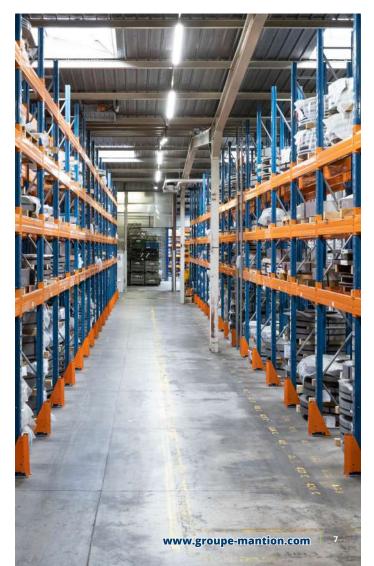

PRESS BRAKES

Equipped with a high-performance machine fleet, our press workshop carries out cutting, stamping, and forming operations with exceptional precision and controlled production rates.

SHIPPING DEPARTMENT

Our shipping department ensures optimized logistics and reliable deliveries, enabling us to ship our products worldwide with speed and efficiency.

Our workshops

ASSEMBLY WORKSHOP

Our assembly workshop is a place of precision, where each component is carefully assembled to ensure the quality and reliability of our products.

SHEET METAL WORKSHOP

Our sheet metal workshop handles cutting operations (laser, punching, shearing), bending, and welding on sheets of various thicknesses, producing custom parts that combine precision and quality.

TURNING WORKSHOP

Our turning workshop manufactures complex parts in small or large series, with a high level of precision and consistency.

Voici les raisons pour lesquelles vous choisirez

Quincailliers !...

MANTION, European Leader in Sliding Systems for Over 100 Years

Our History

From 1920 to today, we've come a long way!

From a small neighborhood workshop to a state-of-the-art factory.

The days of the small ornamental ironwork shop seem far away — for decades, customers from the region came to source gates, railings, shutters, and doors. Even then, the MANTION name stood for quality.

To meet growing demand from across France, the main factory was established in 1964 at its current location on Rue Gay Lussac in Besançon. After numerous expansions and upgrades, MANTION made the strategic decision in 2011 to streamline the Besançon facility.

Between 2011 and 2014, without any drop in service levels or production halts, the site was completely redesigned and transformed.

A successful challenge!

Though complex, the operation enabled the MANTION Group to continue its growth. The factory gained 4,500 m² of industrial space and doubled its storage capacity to accommodate 10,000 pallets. This streamlining of the Besançon plant optimized production processes and strengthened competitiveness.

Alexandre Mantion founds MANTION in Besançon, France.

1935

Mantion makes opening and closing systems for sliding doors in the farming sector and, later, the residential sector.

The first price list for roller assemblies is published in 1935.

1955

First patent filed.

1964

The company continues to grow and moves to Trépillot industrial estate, near Besançon, which is still home to its main manufacturing site and head office today.

1965

Raymond Mantion designs the Tubel range.

1981

The Hercule range is created.

1993

MANTION acquires the German company B&K in Heiligenhaus. B&K becomes MANTION Baubeschläge Gmbh in 2002.

2001

MANTION acquires Bourquin Décolletage in Ornans, France.

2004

A new sheet metal processing line is created and Formatol is founded.

2006

MANTION becomes ISO 9001 certified

2008

MANTION acquires Wimove in Genlis (France), which specialises in motorisation.

2009

MANTION becomes ISO 14001 certified

2013 - 2016

Global expansion of the group: new offices open in India in 2013, in Dubai in 2014 and in Singapore and Mumbai in 2015. Entry into the North American markets with the setting up of MANTION Canada in Quebec in 2016.

2020

THE GROUP CELEBRATES ITS CENTENARY.

2023

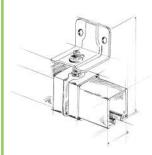

M. Florian Cunin is appointed chairman.

2024

MANTION receives CSR Commitment Charter certification from UIIMM

1949

The company becomes SARL Raymond Mantion & fils

1930

MANTION is specialised in wrought iron.

1964

Mr Verheyde becomes chairman and majority shareholder.

1961

The Sportub range is created.

2000

Denis Schnoebelen is appointed as chairman

1992

Jean-Pierre Essert is appointed as chairman.

1966

Mantion gains its first two export customers: Heinr. Betz Söhne in Germany and Redson in the Netherlands.

2012

Thanks to a wealth of success, the group expands and renovates its Besançon plant, extending the footprint to over 20,000 m²

2005

MANTION Handling System opens in Warsaw, Poland.

2003

Mantion acquires a majority stake in Valcomp in Warsaw, Poland.

2022

Martial Devaux is appointed chairman. Florian Cunin becomes CEO.

The office in India becomes a subsidiary.

2021

Bourquin Décolletage becomes Atelier de Décolletage MANTION.

2019

Martial Devaux steps in as CEO.

Present on 5 continents and in over 80 countries, MANTION proudly contributes to making "Made in France" a mark of quality.

Thanks to dedicated sales teams and the presence of subsidiaries and offices in distant markets, the MANTION Group remains close to its clients and architects—offering strong technical support and specification expertise.

Our signature ranges

SPORTUB®

The SPORTUB® sliding range is MANTION's most iconic. It has been a first choice for most hangars and industrial/agricultural buildings for over 60 years now!

A simple yet sophisticated high-quality system, to divide spaces. The SAF® range offers three different weights to meet a variety of needs as regards wood or metal-framed doors. This system is designed to offer users utmost comfort. With its soft closing system, the door never stays half open, even if you forget to close

Cantilever system

In the 1990s, MANTION came up with the innovative idea of using a cantilever system for sliding gates. The system enables sliding gates to operate without ground tracks. It remains the most popular system in the professional world today.

Our signature ranges

ROC® DESIGN

Discover our Roc®-Design range! This flat-track sliding system is delivered with a door closing damper in each track kit and provides an amazing look and finish. The range is designed for doors weighing 80 to 120 kg.

Components are protected by a highly shock-resistant certified coating.

Enjoy a choice of hanger designs and track lengths to meet your every need!

OPENTEC®

FOLDING-SLIDING SYSTEM FOR DIVIDING SPACES & CREATING LARGE OPENINGS

The OPENTEC range offers a wide choice of systems, to create flexible flowing spaces and large openings, onto the outside. Technically, the system is suitable for use with large-sized panels, whatever the material (steel, wood, aluminium, glass, etc.), to create movable partition walls and wide openings.

WIBAT®

Designed and made in France by MANTION, WIBAT®'s all three ranges of motorised systems for shutters come with a 5-year warranty. WIBAT® LINTEAU for all types of swing shutters, WIBAT®-APPLIQUE, with a motorised arm, and WIBAT®, with a motorised hinge pin. All the motorised systems are available in single or double-leaf versions and can be installed on new builds or renovated buildings.

Our Commitments

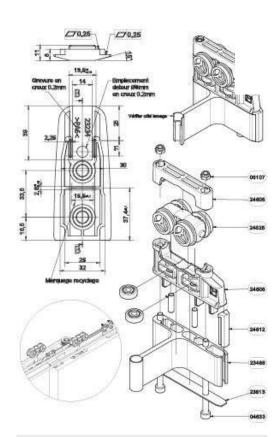

A Step Ahead in **Innovation**

Innovation

With the ambition to lead in innovation and be a pioneer in its market, the MANTION Group invests approximately 4% of its revenue in research and development. 20 dedicated professionals (representing 10% of the Group's workforce) work daily across four specialized R&D centers:

- **Besançon** (France): Design office for heavyduty sliding applications.
- **Besançon** (France): Design office for overhead handling systems.
- **Genlis** (France): Electrotechnical and electronic design office for motorization systems.
- Warsaw (Poland): Mechanical design office for wardrobes sliding systems.
- **Besançon** (France): Design office for heavyduty sliding applications. .

MANTION also collaborates with cutting-edge university laboratories and organizations such as CETIM to support highly specialized research. The Group regularly files international patents to protect its innovations.

R&D 4% of turnover

Demanding and rigorous, the MANTION group implements an exemplary quality policy, which involves all the company's teams.

As well as being certified to **ISO 9001: 2015** for several years now, MANTION's concern about its environmental impact has also led it to obtain **ISO 14001: 2015** certification.

In addition to quality certification, MANTION is committed to meeting the highest product standards, such as **EN 1527**, **PR NF P26-341** and **NF EN 12045**. Our commitment goes beyond applying the standards, as we actively participate in work on standards in the countries in which the group is based (France, Germany and Poland), and at a European level, with the European Committee for Standardisation.

MANTION has its very own control laboratories to guarantee the quality of its products. All systems are tested against the highest standards.

By investing in a MANTION sliding system, customers are guaranteed to own the most reliable and durable system on the market.

MANTION expresses its commitment to quality by offering its customers 5, 10 or 25-year warranties on products sold to professionals.

CSR Charter: Corporate Social Responsibility

Our CSR charter is built on several fundamental pillars:

Environmental Commitment

We are committed to reducing our ecological footprint by adopting sustainable practices and promoting green innovation. We firmly believe that every action counts and that we all have a role to play in protecting our planet.

Our ISO 14001 certification reflects our rigorous management of the environmental impacts associated with our activities.

Quality and Certifications

Our commitment to quality is reflected in a product offering that meets the strictest standards.

Our ISO 9001 certification ensures effective quality management and continuous improvement of our processes.

Quality of Life and Working Conditions

We strive to provide an inclusive, respectful, and fulfilling work environment for all our employees. We are committed to creating a workplace where everyone can thrive.

Social Responsibility

We actively support local initiatives and community projects that contribute to societal well-being. As a local stakeholder, we are deeply committed to the development and prosperity of our region.

Ethics and Governance

We promote transparent, ethical, and responsible management, in full compliance with applicable laws and regulations. Integrity is the cornerstone of our reputation and success.

Together, we can make a difference and contribute to a fairer, more sustainable future.

Main Clients and Partners

MANTION's Clients

Professional distribution network:

Over 2,000 retail outlets across France.

- Door, fire door, gate, and shutter industries
- Craftsmen and building professionals: Metalworkers, carpenters, aluminum joiners, installers
- Specifiers:

Quantity surveyors, architects, and interior designers for decorative projects

- **Private customers** via DIY superstores and e-commerce platforms
- **Subcontracting** for large-diameter turning (10 to 240 mm)

MANTION, Projects Around the World

Patronage

SPONSORSHIP WITH LA CITADELLE DE BESANCON: Benches project

A major asset for the Bourgogne-Franche-Comté region and the city of Besançon, the Citadelle de Besançon is a UNESCO World Heritage Site. Alexandre Arnodo, the site's Director, has launched a project involving local businesses, so that the Citadelle can also act as an ambassador for local companies.

It was in this context that MANTION was approached in 2022 to carry out an industrial sponsorship action by the Citadelle, as part of its project to create the «Vauban Garden» by making 5 benches.

Various MANTION teams were called on to carry out the project:

design office, sheet metal work, screw-cutting, etc., calling on different skills such as welding, bending and producing assembly instructions.

The benches are made of steel and each leg weighs 100 kg; the weight of the benches varies from 340 kg to 1060 kg, and the longest bench measures over 10m. The wooden seats were made by PRETOT.

The legs of the benches represent the V of Vauban. The garden was inaugurated on 12 July 2023.
